Skylights

Introducing the new
Solar Powered
"Fresh Air" skylight

The Solar Powered "Fresh Air" skylight

The Solar Powered "Fresh Air" skylight features a solar panel that captures any available daylight and uses it to recharge a highly efficient, fully concealed, battery powered operator and control system. The battery powered operator is the power source that opens and closes the skylight, and the solar panel serves as the charging source for the system.

- Remote controlled solar powered skylight requires no wiring, which makes for easy and cost effective installation.
- The solar panel will work on cloudy days and with indirect light. It does not have to be exposed to direct sunlight to function.
- With an integrated rain sensor the solar powered skylight will close automatically, in case of inclement weather.
- With a 30% federal tax credit homeowners receive an average of \$850* with federal tax credit eligibility which makes this product very affordable for any skylight application.
- Eight factory installed blinds are available to include in the purchase of your skylight. Over 80 special order blinds also available.** The blind uses its own independent, built-in, solar panel and power system.
- If the Solar Powered "Fresh Air" skylight is ordered with a factory installed blind, the skylight and blind will arrive pre-programmed to one remote control.

* For more information visit www.veluxusa.com/taxcredits

** Special order blinds are not available to be factory installed and ship separately.
